

The Glue Pot Kit

Just add water and a heat source.

Hide Glue (dry/ground) is the absolute best choice when working in antique care and restoration. We hesitated about offering it to our customers because its use requires the customer to obtain a glue pot, which for only occasional use, might not be justified.

As a solution, we devised a workable unit using three round metal tins. Two tins are used as the pot and the third contains glue granules.

Also included are a brush for application and aspirins to retard spoilage — plus an instruction sheet. You add water and supply a heat source. The 'pot' can be re-used many times and glue refills are available.
